NHS SUPPORTERS - PROTECT YOUR NHS

Our treasured NHS is under threat. We believe that the coalition government's health reforms will break up NHS services. At the heart of the NHS should be patients, but business motives are cutting deeply into the fairness, quality and value that we have come to expect. It will mean:

- the break up of the NHS as a network that works together and puts patients first
- cuts to frontline jobs and services - leading to longer waiting times
- a healthcare lottery: your age, your medical condition, or where you live, could all affect the quality of care you receive
- more waste on the NHS market bureaucracy which drains money from patient care
- a big increase in private companies running our health service for profit

Please add your name to our petition to show your opposition to the government's proposals.*
